Landscape Service . . .

WE ARE prepared to design and execute all types of gardens both for large estates and small homes.

Being growers, we have the advantage of knowing the exact requirements of different plants. The knowledge is absolutely essential to obtain the best results. Proper planting has much to do with the permanent beauty of any home or public building and thoughtful consideration should be given to the selection of the location of the building or buildings on the lot itself.

While Mr. Fiore, who personally supervises our Landscape Department, makes a specialty of the development of new places, he is fully as competent to advise changes which will add to the completeness of the home surroundings. Let us solve your landscape problems for you—profit by our years of experience.

The proper planting of your home grounds or estate is exceedingly important not only because it is judged by passers-by but because it adds beauty as well as valuation to your property.

Due to the conditions of different soils it has been quite difficult to arrive at the cost of planting nursery stock. In order to give our customers the benefit of the doubt, we find the best method to solve this problem is to make a charge in accordance with the size of the order and the distance at which the said nursery stock is to be planted. First-class, freshly dug nursery stock should not be compared with department store material or roadside material.

There is an increasing demand for plant material in the early summer months and again in the late summer, at a time when plants cannot be moved satisfactorily with bare roots. During these seasons all plant material should be moved by being balled and burlapped. When the balled and burlapped prices are not given the cost of this service will range between one-half and the full cost of the particular item.

Mr. Fiore has received many awards for his gardens at the various Horticulture Shows

At our Nurseries you will find not only a large selection of fine Nursery Stock listed in this catalog, but also a marvelous collection of imported Statuary for distinguished gardens.

Ornamental and Hardy Shade Trees

This section of our nursery business requires a great many acres of land distributed in immense blocks to whatever variety of soil is adapted to each peculiar kind of tree.

In various latitudes, different climatic conditions prevail and accordingly affect vegetation so that it should be borne in mind to consult those who have had experience as to what is likely to thrive in a given locality rather than to plant trees at random. Our list of trees is not a large one, but we prefer to name only those that are certain to thrive within a reasonable distance of Chicago, and have always this in mind. We shall be pleased to advise at any time as to the best kind to use for a given purpose in any locality.

We are always pleased to allow personal selection by our customers for particular ornamental trees, but in no such case will list apply, extra charges will be made for such service.

JAPANESE FLOWERING CHERRIES

Varieties of *Prunus Serrulata Sachalinensis* type

Thousands of people journey to Washington, D. C., every spring to admire the wonderful display of Cherry-blossoms along the Potomac Basin, where are planted several hundred cherry trees presented to the United States by the Japanese government. All Japanese Cherries we offer are hardy and will grow well in almost any location, even in very shallow soils. They make splendid specimen trees and the stronger growing sorts are suitable for avenue trees.

FLOWERING SHRUBS

Everyone knows that shrubs are indispensable, whether on private places, in parks, or any grounds, and may be used in any situation, around porches, at the base of houses, at the entrances, between trees, and as backgrounds for perennial borders, or specimens; wherever planted, they always make handsome effects.

Our assortment consists of all hardy varieties and is such that flowers may be had during the entire growing season together with the various colors of the bright yellow, brilliant red, and somber shades of purple and variegated foliages. Most shrubs bear very interesting seeds, many are berries in a variety of colors that create an additional beauty and usefulness.

Evergreens for Year-round Beauty

Evergreens are always impressive in winter. They give a note of cheer and warmth to the winter landscape. The influence of evergreens around the home gives a friendly aspect to your surroundings. If for no other reason, the winter effect alone makes evergreens worth-while.

It is satisfying to know that your planting of evergreens increases in value each year. At the same time it adds dignity and stability to the appearance of your home grounds.

Each "X" indicates one transplanting. "B&B" signifies balled and burlapped.

Advice to Correspondents, Directions to Customers, and Conditions of Sale

This catalog and prices herein supercedes those previously published.

Prices are for goods f.o.b. nurseries or cars Prairie View, Illinois, exclusive of packing, express, freight, or transportation charges; packing charges are extra in addition to cost of plants. No charge for packing on car lot orders in bulk.

Prices are subject to cancellation or change without further notice upon prior sale or depletion of our stock of goods.

In the rush of the planting season, customers calling at the Nursery will be better waited upon and served by making an appointment in advance by phone or letter.

Whenever we are asked by customers to make special selection of the items for them we add 15% to catalog prices for items selected.

All nursery stock selected or tagged by customers in the Nursery will be charged for according to the value of the plants chosen, usually catalog prices plus 25%.

ORDERS: Write plainly and give explicit directions as to address and mode of shipment, whether by freight, express, etc.

Orders are accepted and all shipments made subject to delays or inability to ship or deliver by reason or on account of strikes, accidents, droughts, fire, floods, frost, hail, sleet, war conditions and orders, prior sale of stock, stock shortage, labor or car shortage, or any other cause or causes for delay in shipment or delivery of goods which are beyond our control.

GUARANTEE AND CLAIMS: In growing and furnishing all Nursery stock we exercise the utmost diligence and care to have it true to name and will on proper proof, within one year from date, to our satisfaction, replace in ordered sizes any that will prove otherwise or refund the amount paid. Any and all sales made by us do not include any warranty expressed or implied, as to quality, description, productiveness, growth, or any matter or qualification pertaining to the Nursery stock sold.

It is mutually agreed and understood between the Purchaser and Ourselves, that in any case we shall not be liable for a sum greater than the amount originally paid us for any tree or plants, etc., that prove untrue.

IN MAKING ALL SHIPMENTS WE CAREFULLY CONSIDER CONDITIONS IN GENERAL AND ACT ACCORDINGLY.

ALL SHIPMENTS AT PURCHASER'S RISK.

In absence of specific shipment instruction, we are to route all shipments according to our best judgment without assuming responsibility.

If destination is a PRE-PAID Station, freight charges will be prepaid by us and charged for on invoice.

CLAIMS for Errors or Shortage must be filed with us within Ten (10) days after receipt of goods. No claims for errors or shortage in excess of purchase price will be considered. Claims for damaged stock, damaged en route by Railroad or Express Company, shall be immediately reported and entered with your local agent or transportation company.

PAYMENT OF ACCOUNTS TO BE MADE AS FOLLOWS:

Remittances with order will be considered payment on account inasmuch as chargeable packing charges, or prepaid express or freight, or cost of trucking cannot be ascertained until goods are packed, shipped, or delivered, as the case may be.

All accounts 30 days net cash.

The condition may arise where the entire amount of all invoices for stock shipped will be less than the amount, or amounts, remitted, in which case the unearned portion of remittances will be refunded as soon as the shipping season is over and our books and accounts have been properly audited, if not before.

Payments for partial shipments shall be due on basis of Invoice dating of same.

Accounts after date due, will be subject to a sight draft, also interest charge at the rate of 6% per annum.

All will be shown on invoices, and in case of overpayment by remittance for goods actually sent proper refund will be made of the unearned portion of remittance, as soon as our shipping season is over and books and accounts have been properly audited, if not before.

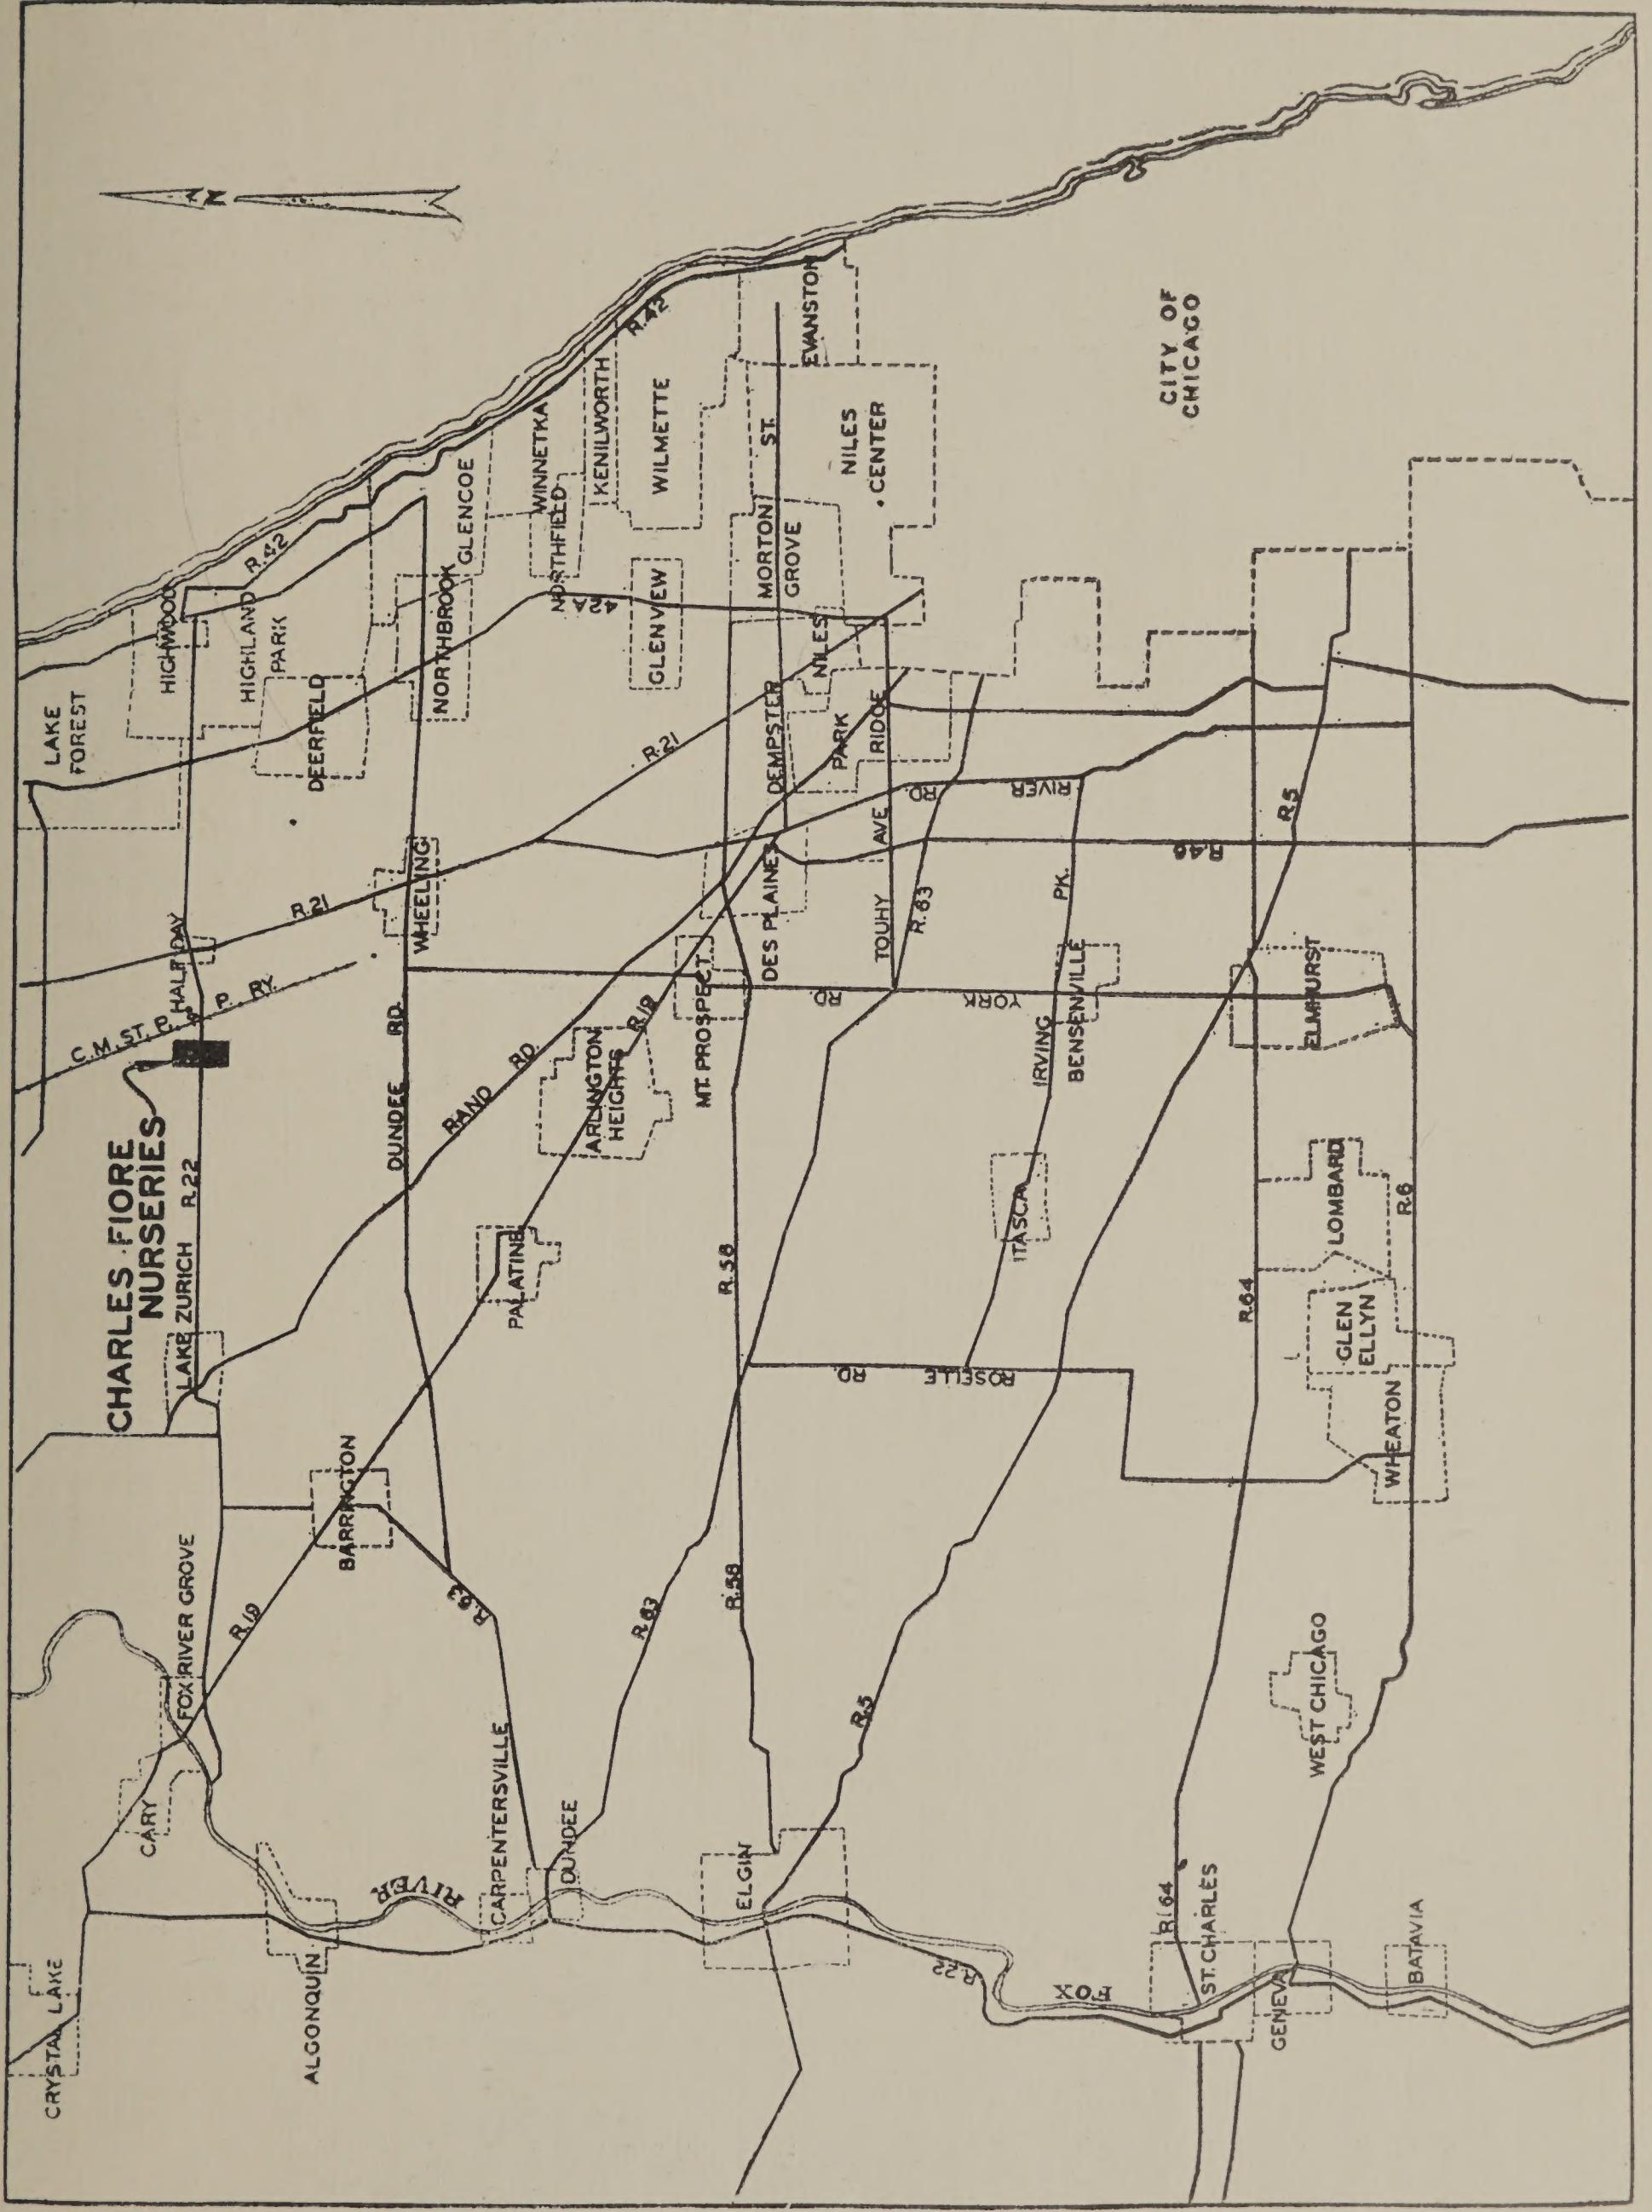

CASH OR SATISFACTORY REFERENCES WITH ORDER, IF PURCHASER HAS NO CREDIT ESTABLISHED WITH US.

Certificate of inspection will be furnished with each shipment.

Hedge Making in Thirty Minutes

This picture shows plants not even three years old. This first and only trimming as you see it here, took exactly thirty minutes.

To accomplish a formal hedge of the ordinary sprawling Barberry, recurring destructive trimming of fresh tip foliage, exposing ugly bare branches, is required over a period of three to four years. And the trouble has only commenced for the hedge immediately grows ragged and informal and must be sheared about every three weeks at great labor and expense.

Truehedge Ultimately Less Expensive

Columnberry saves expense because practically all the trimming required is simple, infrequent clipping across the top of the desired height.

Japanese Cherries

They are a distinct and valuable addition to our spring blooming trees. During the month of May they are covered with very double flowers in white, all shades of pink, and rose colors. During the summer they are excellent small shade trees or large shrubs. See page 6 for price list.
